DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following invention is required under 35 U.S.C 121:
 - A. Claims 1-15 are drawn to a method and system for maintaining equipment inspection records between remote computers, classified in **class 709, subclass 203**.
 - B. Claim 16 is drawn to an identification tag for a sling, classified in **class 40, subclass 316**.
 - C. Claim 17 is drawn to a method of identifying equipment for inspection, classified in **class 340, subclass 10**.
2. Inventions A, B, and C are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as a method and system for maintaining equipment inspection records between remote computers, classified in a *different Class/Subclass*. Invention B has separate utility such as to an identification tag for a sling, classified in a *different Class/Subclass*. Invention C has separate utility such as a method of identifying equipment for inspection, classified in a *different Class/Subclass*. See MPEP 806.05(d).
3. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2143

(a) these inventions have acquired a separate status in the art as shown by their difference classifications.

(b) the search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be the co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group A search (claims 1-15) would require use of search **class 709, subclass 203** (not required for the inventions B and C).

The Group B search (claim 16) would require use of search **class 40, subclass 316** (not required for the inventions A and C).

The Group C search (claim 17) would require use of search **class 340, subclass 10** (not required for the inventions A and B).

For the reasons above restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).
